

Job Description

Position Title:

Technical Project Manager (Production Base – Chief Engineer)

Location:

Wilcox, Elk County, Pennsylvania

Company:

Unisil USA, LLC

Industry:

Specialty Chemicals – Silicones

Overview:

Unisil USA, LLC, a leading provider of specialty silicone solutions for the construction and coatings industries, is seeking an experienced Project Manager to serve as Chief Engineer of the Production Base. This on-site leadership role is key to managing all technical operations, overseeing construction and modernization projects, maintaining production equipment, and introducing innovative technologies to support our growing U.S. operations.

This position reports directly to the Director of Unisil USA, LLC and works in close coordination with the Technical Team in Europe.

Key Responsibilities:

- Oversee the maintenance and operation of production base equipment and facilities
- Manage the construction and reconstruction of industrial and support buildings
- Lead the implementation and integration of new equipment and technologies into production
- Ensure compliance with industrial safety standards, technical supervision, and coordination with regulatory authorities
- Support investment activities by coordinating project planning, documentation, and execution
- Analyze operational processes, develop improvement plans, and prevent technical failures
- Supervise project documentation, budgeting, scheduling, and contractor coordination
- Guide and oversee the performance of engineering and maintenance personnel
- Report regularly to company leadership on project progress and operational performance

Qualifications:

- Higher professional (technical) education

- Minimum 5 years of managerial experience in a relevant industrial or production environment
- Proven expertise in project management, equipment maintenance, and facility operations
- Strong understanding of technical standards, construction codes, and safety regulations

Skills & Competencies:

- Strong leadership and organizational abilities
- Excellent verbal and written communication skills
- Proficiency in project planning, budgeting, and reporting
- Ability to manage cross-functional teams and work collaboratively across departments
- Practical problem-solving and critical thinking skills
- Russian language skills are considered an advantage, given collaboration with international technical teams

Benefits:

- A competitive salary based on experience and scope of responsibility
- Performance-based bonuses tied to company development
- Paid time off and recognition of public holidays
- Professional development opportunities to support your continued growth
- A central leadership role in the development and expansion of our U.S. operations
- Close collaboration with executive and technical teams across North America and Europe
- A dynamic, hands-on work environment with direct impact on production and strategic planning

Work Environment:

This is a full-time, on-site position located at the production base in Wilcox, Elk County, Pennsylvania. The role involves active engagement with industrial facilities and requires regular presence on site to supervise operations, projects, and personnel.

Start Date:

The ideal candidate will be available in Q3 2025.

How to Apply:

Interested candidates are invited to submit their **CV, cover letter**, and relevant documentation outlining their **qualifications** and **work experience** via email.
